IULIIA BORODINA

SENIOR PRODUCT DESIGNER | FINTECH, LOYALTY & SUBSCRIPTIONS

Moscow, Russia | Open to relocation (visa sponsorship required) or remote
jdborodina@gmail.com | +7 977 771-24-14 | jdborodina.art

SUMMARY

Product designer with 7+ years in fintech, focused on retention, loyalty and subscriptions. Designed Ozon Bank's Ozon Premium subscription and the loyalty program of Russia's largest bank (80M+ members). Psychology background: I validate ideas with users and A/B tests and measure results in business metrics. Mentored junior designers at SberSpasibo and taught web design at one of Russia's largest EdTech companies.

EXPERIENCE

Product Designer | Ozon Fintech (Ozon Bank)

Jan 2025 – Oct 2026

Ozon Premium: paid subscription with perks across the Ozon marketplace and bank.

- Reduced subscription churn by 20% (A/B test, 9 groups, significant in every group) by turning a one-screen request into a full redesign of the cancellation flow, informed by a teardown of 7 competitors' flows. Rolled out to 100% of users; an ML model now picks the screens shown to each customer.
- Designed 20+ marketing launches and partner collaborations for Ozon Premium, including landing pages and entry points on both Ozon and partner sides, plus new entry points into the subscription; together with marketing, grew the paid subscriber base by 31% in 1.5 years.
- Increased conversion to the annual family plan by 7% via an add-members widget in the redesigned account.
- Built a UI component kit for assembling and styling user flows, later adopted by designers on at least 5 teams to speed up flow assembly in Figma.

Product Designer | SberSpasibo

Mar 2022 – Jan 2025

Loyalty program of Russia's largest bank, 80M+ members: app, web and mobile banking.

- Increased coupon-to-purchase conversion by 18% and cut coupon-related support contacts by 64% by testing the redesign on a prototype with 11 users and reworking 4 key decisions before development.
- As the sole designer of the Partners & Offers redesign across app, web and mobile banking (a 15-team program), raised offer participation by 27% and cut offer-related support contacts by 31%; designed opt-in offer mechanics from scratch.
- Rebuilt legacy UI into new platform components, helping raise offer-launch automation from 20% to 80% and launch offers ~2x faster. Unified the design system across iOS, Android and web.
- Covered 5 product teams in parallel and led the design of 2 new product launches; when the workload outgrew one designer, secured extra capacity from the CPO, then led 3 junior designers (onboarding, tasks, reviews).

Web Design Instructor (part-time) | Skillbox

Feb 2024 – Oct 2024

One of Russia's largest EdTech companies.

- Taught web design to a cohort of 6 students through graduation: 4 of 6 (67%) were hired as UX/UI designers.

Product Designer | Navigator
Oct 2019 – Apr 2022
Digital product contractor for B2B and B2C clients.

- Took 3 customer account products from discovery to MVP for a 3M+ user audience, using JTBD and 50+ user interviews; shipped 3 web and 3 mobile apps and created the brand identity.
- Client work included Alarm, a B2B SaaS for workforce management (-23% time on shift scheduling via automated scheduling), and SIBUR (online document onboarding for new hires, 8 flows).

Product Designer | Future is Now
Oct 2018 – Nov 2019
Non-profit organization.

- Redesigned the homepage and key user flows: +38% key-page conversion, +64% applications.

EDUCATION

HSE University, Art and Design School
Digital Product Design and Development | 2021

Lomonosov Moscow State University
Specialist degree in Psychology (6-year program, Master's level) | 2019

SKILLS

Product design: user research, discovery, JTBD, CJM, user interviews, usability testing, A/B testing, information architecture, interaction design, wireframing, prototyping, design systems, accessibility, retention and loyalty mechanics, AI-assisted research synthesis, product metrics, stakeholder management

Tools: Figma, Claude Design, Claude Code (coded prototypes, personal site), ChatGPT, Midjourney, Notion, Miro, FigJam, Jira, HTML/CSS basics

Languages: Russian (native), English (C1), Spanish (A2)
